QGIS Application - Bug report #19622
Using a Field Attribute (Variable) in Font Marker, Symbol appears correctly in Map, but not in Legend
2018-08-14 01:02 PM - Tobias Wolff

Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27449	

Description

When using a variable for Font Marker Symbol to label points, the variable is not interpreted in print composer's legend.

I guess it's not a quick fix, as the font marker variable is not necessarily linked to a categorized field and symbols might need to be repeated within an already categorized field. But typical use case will be "categorized value == shown field attribute".

Using labels is no option here, as labels won't show up as a symbol in legend by design.
