<b>Description</b>		
<p>qgis 3.2.1, windows 10.</p> <p>I have geojson file and postgis table. They have same columns but different column order. And additional column `id` in postgis table. When I copy from json and paste to postgis table it adds new feature but with empty columns, see pics.</p> <p>In qgis 2.14 it worked perfectly.</p>

Can't reproduce. Tested on linux, version 3.3.0 commit:225c9227af.

I've tested with a GeoJSON layer with 93 fields, copied a feature with the attribute table dialog from this to a postgis layer that has only 3 fields of the same name, and it works perfectly.

##### #3 - 2018-10-24 08:34 AM - Hugo Mercier

- Resolution set to not reproducible
