<b>Affected QGIS version:</b> 3.2.1	<b>Regression?:</b> Yes
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> no timely feedback
<b>Crashes QGIS or corrupts data:</b> Yes	<b>Copied to github as #:</b> 27473

### Description

### User Feedback

QGIS crashes when I try to preview my atlas. It seemed to be working fine until I added a text box with html that displays an image. The html used is the following:

```

```

The workspace worked ok, even with the html text box, until I closed the workspace and then reopened it. Since then it crashes every time I try to preview the atlas. If I delete the text box then the preview works fine.
