

## QGIS Application - Feature request #19685

### Some algorithms that could support geometryless layer do not

2018-08-24 03:34 PM - Harrissou Santanna

| <b>Description</b>   |                                      |
| <p>Browsing the algorithms input layer parameter, I realized that there are some algorithms that could support table as input but do not:</p> <ul style="list-style-type: none"><li>- the Extract (by attributes/by expression/selected features) do not allow table while it's possible with their corresponding "select by..." algs</li><li>- the Export to database algs</li><li>- the "Basic statistics for fields" while the "statistics by categories" allows it</li><li>- some of the "vector table" algorithms: "Add unique value index field", "Advanced Python Field calculator"</li></ul> |                                      |
