

QGIS Application - Bug report #19711

[Processing] Distance units drop-down is reset after each execution

2018-08-27 04:08 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee:	
Category: Processing/GUI	
Affected QGIS version: 3.3(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: not reproducible
Crashes QGIS or corrupts data:	Copied to github as #: 27536
Description	
<p>Open an algorithm that uses a distance parameter, with the drop-down units widget (let's say for example "line substring")</p> <p>Fill the values and change the current units to another one</p> <p>Run the algorithm</p> <p>Enable the Parameters tab (in my case I disabled the algorithm closure after execution), you'll see that the units comboboxes are reset to their initial value.</p> <p>Because they are the only parameters that change in the dialog, and I think user does not expect this, the previously set (and run) unit should be kept (for further trials).</p>	

History

#1 - 2018-08-27 04:21 PM - Harrissou Santanna

- Resolution set to not reproducible
- Status changed from Open to Closed

Doing some further tests, I'm unable to reproduce. Wonder if i inadvertently switch layers but i'm not sure.
Closing for now but i'm pretty sure that I did not dream it. Will investigate.
