Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Easy fix?:	No		**Copied to github as #:**	27554

Description

I am able to create tiles using the Qtiles plugin. I would like to be able to use those tiles directly in Qgis. Could the XYZ provider by modified to allow this type of tile layer?

History

- Category changed from Data Provider to Web Services clients/XYZ

#2 - 2019-03-01 11:03 AM - Johannes Kroeger

- Resolution set to fixed/implemented

- Status changed from Open to Closed

You can do that using "XYZ Tiles" in the Browser. Prepend your local path with file:// and use a templating system like {z}/{x}/{y}.ext for the full paths. For example file:///tmp/awesome_tiles/{z}/{x}/{y}.png
