QGIS Application - Bug report #19734
Copy/paste a renderer class from the contextual menu does not work

2018-08-30 12:07 PM - Harrissou Santanna

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Affected QGIS version:	3.3(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27559

Description

Apply a categorized or a graduated symbology to a layer

Right-click on a class and select "copy"

Then right-click and select Paste. Nothing happens.

If you do select the class then press Ctr-C, Ctrl-V, a new class is added.

Copy/paste works well in a rule-based renderer case.

Would also affect 2.18

PS: It could be nice if the focus/selection was moved to the pasted item(s) instead of the original ones (as the user may want to customize them). This is how the rule-based renderer copy-paste works.

Discussed at http://osgeo-org.1560.x6.nabble.com/how-duplicate-the-rendering-of-a-value-td5376157.html
