

QGIS Application - Bug report #19737

map_layers variable does not return layer names

2018-08-30 04:27 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee:	
Category: Expressions	
Affected QGIS version: 3.3(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 27562

Description

Select a map item in the layout

Scroll to the variables frame in the item properties and check the map_layers variable; it shows `[<map_layer>, <map_layer>,&...]`. I'd have expected to see layer names instead. Checking this variable in the expression dialog of a property of the map item also displays the same output (at the bottom of the dialog)

History

#1 - 2018-08-30 10:49 PM - Nyal Dawson

Those are layer values though, not strings

#2 - 2018-08-31 03:01 PM - Harrissou Santanna

Ah, right. Not sure what would then be the "fix". Should we close this?

#3 - 2018-08-31 10:38 PM - Nyal Dawson

- Status changed from Open to Closed

I think so.

#4 - 2018-09-02 04:54 PM - Giovanni Manghi

- Resolution set to invalid
