QGIS Application - Bug report #19761
Unable to close QGIS because of an (ghost?) active task

2018-09-03 07:37 PM - Harrissou Santanna

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Project Loading/Saving			
Affected QGIS version:	3.3(master)	**Regression?:**	No	
Operating System:	Windows 10	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27586	

Description

I'm trying to close QGIs hitting the X button but fail with an "Active Tasks" dialog that pops up stating that Identify features tool is being busy (attached image). Any choice I do in this dialog does not help to close QGIS.
Also notice that clicking on the status bar I see the Identify features task in the list but at 100% and, anyway looks like I can't interact with this widget.

I finally had to force quit.

Can you reproduce this? I need some more info here.

- Status changed from Feedback to Open

Yes, right now!
Can you tell me the kind of information you need because I'm not sure I did something particular and I'm pretty sure the identify actions are not the latest I
do?

#3 - 2018-10-02 03:39 PM - Nyall Dawson

I guess some steps to reproduce would help... I haven't been able to.

It usually happens when we have identified a feature and then then pan/zoom the map to another position.

We only have Postgres connections in place - maybe that's worth to mention.
