Mie Winstrup wrote - I made a mistake with the pictures - this is an updated issue:

When using the 'Select by Location' tool I can choose only to use the selected features:

SelectByLocation.png

But when I choose to run this tool as a batch process this option is not there - it is also not possible to drag in the field with 'geometric predicate':

SelectByLocation_batchProcessing.png

It would be nice if the same options when running as a batch process and that the scaling of the field works.
