<b>Easy fix?:</b> No		
<b>Description</b>		
<p>Can we pan using WASD/other keyboard buttons, like in Google Earth?</p> <p>W - Up A - Left S - Down D - Right</p> <p>This would allow users to split polygons with right hand and move around the QGIS map rather than have to cross arms to use arrow keys on QWERT keyboard.</p> <p>I know there is a configure shortcuts options via Settings, Configure Shortcuts, but I don't think this gives me the option to set arrow keys?</p> <p>WASD (,AOE on Dvorak keyboards; ZQSD on AZERTY keyboards) is a set of four keys on a QWERTY or QWERTZ computer keyboard which mimics the inverted-T configuration of the arrow keys.</p> <p><a href="https://en.wikipedia.org/wiki/Arrow_keys#ESDF_keys">https://en.wikipedia.org/wiki/Arrow_keys#ESDF_keys</a></p>
