

QGIS Application - Bug report #1984

QGIS Doesn't send VERSION parameter on WMS getCapabilities request

2009-10-06 03:56 AM - guillaume -

Status: Closed	
Priority: Low	
Assignee: Marco Hugentobler	
Category: Web Services clients/WMS	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: wontfix
Crashes QGIS or corrupts data:	Copied to github as #: 12044
Description	
<p>Hi,</p> <p>Although not mandatory in WMS specs, the VERSION parameter has become important since most WMS servers now offer WMS 1.3.0. Using Qgis against Mapnik WMS service, the getCapabilities sent back by Mapnik is 1.3.0 by default (when not requesting a specific version) and Qgis is not able to parse it properly (no WMS_Capabilities or WMT_MS_Capabilities found).</p> <p>So I think Qgis should send VERSION=1.1.0 as long as it can't handle WMS 1.3.0 specs properly.</p> <p>Regards</p> <p>Guillaume</p>

Is there a public available test server instance of mapnik running? Please provide an URL.

QGIS WMS client is supposed to work with 1.3 servers (e.g. QGIS mapserver). Probably the capabilities response from mapnik look a bit different, so it would be good to have a mapnik instance to debug and adapt the QGIS source accordingly.

#2 - 2010-03-26 06:45 AM - Marco Hugentobler

- Resolution set to wontfix

- Status changed from Open to Closed

no user feedback for some time, so closing ticket.
