

QGIS Application - Bug report #1986

fTools basics stats randomly crashes qgis

2009-10-08 06:34 AM - Iroubeyrie -

Status: Closed	
Priority: Low	
Assignee: cfarmer -	
Category: Python plugins	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12046
Description	
Using basic stats from the ftools Tools on a shapefile with strings and reals datas randomly crashes qgis with a segfault. In another hand, reals attributes are listed twice in the combo. Ubuntu Jaunty/QGIS 1.3.0	

History

#1 - 2009-10-10 07:52 AM - Paolo Cavallini

Can you please provide sample data? I have used the plugin extensively, and never got this crash

#2 - 2009-10-12 12:39 AM - Iroubeyrie -

This problem appears with differents datas sources. As a test, take an attribute and click several times on the "Ok" button in the basics stats plugin.

#3 - 2009-10-12 01:57 AM - Giovanni Manghi

I can confirm both the problems under qgis 1.3 from repository and ubuntu 9.04.

I can see the "real" fields duplicated in the layer list of the tool and then also the crashes (seg fault): sometimes is hard to make it crash, sometimes is just a matter of clicking "ok" a couple of times.

#4 - 2009-11-16 01:55 AM - Giovanni Manghi

Hi,

the problem of the attributes listed twice seems to be gone, while the crashes are still there. Just click twice quickly on the "ok" button to get the stats. If you click repeatedly but leaving a little more time in between, no problem at all. Using qgis trunk.

#5 - 2010-05-05 02:41 AM - Alexander Bruy

I think problem with craches when OK button pressed twice related with #2057 (patch added).

#6 - 2010-05-13 03:56 PM - cfarmer -

- Resolution set to fixed

- Status changed from Open to Closed

Patch applied in .
