

QGIS Application - Bug report #19862

window size of child-connect-form is not saved

2018-09-17 10:10 AM - Urs Kaufmann

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Forms	
<b>Affected QGIS version:</b>	3.2.3	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27686
<b>Description</b>		
<p>I want to connect a child-record. The dialog-window that opens has on the left side a list off existing records. The width of this list is to small. If I change the window-size to enlarge this list, then this change of the window-size is not saved. I have to enlarge the window-size every time I want to connect a child-record.</p> <p>PS: the title of the window ("Dialog" in German version) is not really helpful</p>
