

QGIS Application - Feature request #19864

Data source Manager Inconsistency between the browser and left column

2018-09-17 11:45 AM - Esbern Holmes

Status:	Open	<b>Resolution:</b> <b>Copied to github as #:</b> 27688
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
<b>Description</b>		
There is a strange inconsistency between what is available in the left column /vertical tab and what is available in the brows area. Most noteworthy is that "Virtual Layer" and "Delimited Text" are available in the vertical tab area and not in the brows while "XYZ Tiles" and "OWS" are available in the brows area but not in the vertical tab.
