

QGIS Application - Bug report #19953

Labeling: Halo-effect only works with 1mm setting

2018-09-26 10:41 AM - Magdalena Blank

Status: Closed	
Priority: High	
Assignee:	
Category: Labelling	
Affected QGIS version: 3.2.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: no timely feedback
Crashes QGIS or corrupts data: No	Copied to github as #: 27775
Description	
Halo-effect just allows one setting: 1mm. All other settings (greater, smaller halo) does not work.

Is the problem here that you cannot enter decimal values in ANY spin box?

- File *Line width_not working.PNG* added

Good question, mostly I work with Halo.

So I just tried to set decimal values for a background rectangle. In the size X/size Y decimal values are accepted.

Line width doesn't accept decimal values.

So, the problem occurs just in SOME spin boxes.
