## Cyrillic symbols in QGIS Server

2018-09-27 11:32 AM - Alexander Novikov

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> QGIS Server	
<b>Affected QGIS version:</b> 3.2.3	<b>Regression?:</b> No
<b>Operating System:</b> Windows Server 2016	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 27788
<b>Description</b>	
<p>I have a project with Cyrillic attributes and label values. It works perfect in QGIS Desktop. But it seems not working in QGIS Server. There are empty squares instead letters in labels. Rule-based labeling also doesn't work. I've already tried what I could. I've changed system encoding, I've changed encoding in Apache config. Nothing helps me.</p>	

### History

#### #1 - 2018-09-27 11:33 AM - Giovanni Manghi

- Category changed from Labelling to QGIS Server

#### #2 - 2018-09-28 05:21 PM - Alessandro Pasotti

Try setting QT\_QPA\_FONTDIR env var to a folder that contains your fonts, for instance: /usr/share/fonts/truetype/

Unfortunately it doesn't help me.

I should add that latin symbols work perfectly. My server is run under Windows Server 2016.

#### #4 - 2018-10-06 10:12 AM - Alessandro Pasotti

- Operating System set to Windows Server 2016
