It's a bug in the italian translations:

```
>>> self.tr("{0} rows, {1:.3f} seconds")
'{0} righe, {1:.1f} secondi {0}?' {1:.3f?}'

self.tr("{0} rows, {1:.3f} seconds").format(123, 1234.56789) # Error!
```

btw, even if the translation was ok, there is still an error in the reported value ... I'm fixing it now.
