QGIS Application - Bug report #19980
Copy and pasting part of style with geometry error

2018-09-29 09:40 AM - Saber Razmjooei

Status:	Closed			
Priority:	Normal			
Assignee:	Denis Rouzaud			
Category:	Symbology			
Affected QGIS version:	3.3(master)	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27802	

Description

With the new addition to copy and paste part of style by Denis, it always gives an error of geometry mismatch between source and target layers.

IMO, the validation needs to be done on every component. As an example: you might want to copy Form style from a point layer and paste it to a line layer with identical fields. Currently, it comes up with geometry error. But instead, it should check the attribute columns and if they are identical, there should not be an issue with pasting it to the target layer.
