Affected QGIS version: 3.2.3			
Operating System: macos 10.13			
Pull Request or Patch supplied: No			
Crashes QGIS or corrupts data:		Regression?:	No
		Easy fix?:	No
		Resolution:	
		Copied to github as #: 27819	
Description			
<p>Zooming in does not really work from the trackpad. I have a macbook air.</p> <p>This seems like a fundamental feature that users will use with basically everything that they do.</p> <p>I am guessing this issue is logged elsewhere, but there wasn't an easy way to search for it.</p> <p>QGIS3 is absolutely amazing. And I am close to thinking I can ditch arcmap and never look back... but doesnt feel quite there yet.</p> <p>Glitchy zooms is part of it.</p> <p>THANKS</p>
