

QGIS Application - Bug report #2001

Postgis Manager notes for enhancements/bug fixes

2009-10-12 03:34 AM - Giovanni Manghi

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Python plugins		
Affected QGIS version:	master	Regression?:	No
Operating System:	All	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	wontfix
Crashes QGIS or corrupts data:	No	Copied to github as #:	12061

Description

*) enhancement: when loading data from shapefiles, the "choose input shapefile" shows always the home folder (at least under linux) when it opens. It would be better to make it open in the last folder used, otherwise loading many shapefiles not located near the ~ become is very frustrating.

*) feature: allow multiple load from more than one shapefile at one time

*) bug: when a shapefile is loaded into postgis the table list is not refreshed in the database view

*) enhancement: when changing the table structure (by adding/deleting/editing columns) of a postgis layer that is loaded in the map canvas, refreshing the layer after the changes are applied. This already happens in qgis when you alter the table structure using the "properties -> attributes" menu.

*) bug: when adding/editing a column I get always an error if I try to define the length of the field.

*) enhancement: when adding/editing a column, when choosing a particular type, an error is returned if the "can be null" checkbox is not selected. For these particular types should be better to have the checkbox automatically selected.

this would fix among the others this two bugs I have found

*) In a postgis layer if I add a column with the "postgis manager", the attribute table is not immediately updated, as I have to reload the layer to see the changes. This doesn't happens if the column is added trough "Properties -> Attributes".

*) If I delete a postgis column with the "postgis manager" and the I open the attributes table I only see "ERROR" as values. If I reload the layer everything seems fine.

History

#1 - 2009-11-15 08:31 AM - Giovanni Manghi

a few things have been fixed. This is what still remains (they still are just suggestions). I made things a little more clear/detailed if compared with the ticket description.

*) feature: allow multiple load from more than one shapefile at one time

*) In a postgis layer if I add/edit a column with the "postgis manager", the attribute table is not immediately updated, as I have to reload the layer to see the changes. This doesn't happens if the column is added through "Properties -> Attributes".

*) If I delete a postgis column with the "postgis manager" and then I open the attributes table I only see "ERROR" as values. If I reload the layer everything seems fine.

*) bug: when adding/editing a column I get always an error if I try to define the length of the field. It seems that doesn't happens just with the "char" data type.

I see that "can be null" checkbox is selected by default, nevertheless I suggest that with datatypes that "cannot be null" to make the checkbox not active to avoid people uncheck it.

This is not a core plugin. The report should be moved to the new additional plugin tracker when ready.

Replying to [comment:3 pcav]:

This is not a core plugin. The report should be moved to the new additional plugin tracker when ready.

when ready I'll do it ;) but I hope also that this plugin will become core

#4 - 2011-03-07 05:43 AM - Paolo Cavallini

It cannot for now, as it would introduce a heavy dependency (shp2pgsql and pgsq2shp, which means the whole [[PostgreSQL]]+PostGIS in Windows).

#5 - 2011-03-07 07:56 AM - Jürgen Fischer

Why not? We don't include GDAL binaries either...

In our repository that is. And shp2pgsql/pgsql2shp doesn't require more than a [[PostgreSQL]] connection - just like QGIS itself.

#7 - 2011-12-16 01:58 PM - Giovanni Manghi

- Target version changed from Version 1.7.0 to Version 1.7.4

#8 - 2012-03-02 04:36 AM - Giovanni Manghi

- Crashes QGIS or corrupts data set to No

- Pull Request or Patch supplied set to No

- Affected QGIS version set to master

Martin, I filed #5113 about this issues in the DB Manager redmine subproject. If we consider that DB Manager will replace Postgis Manager than probably we can close this ticket.

#9 - 2012-04-16 06:22 AM - Paolo Cavallini

- Target version changed from Version 1.7.4 to Version 1.8.0

#10 - 2012-05-12 04:50 AM - Alexander Bruy

- Status changed from Open to Feedback

Now DB Manager in core, so I think we can close this ticket

#11 - 2012-05-14 10:07 AM - Giovanni Manghi

- Resolution set to wontfix

- Status changed from Feedback to Closed
