<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27834
<b>Description</b>		
<p>I have QGIS 3.2 in Windows 10 and when I run GRASS algorithms it gives me an error about "raster not found".</p> <p>I access to options and verify the directories. It is all ok but I have all the time this error and cannot run GRASS algorithms.</p>

I found the error.

The parameter "Minimum size of exterior watershed basin" must be a positive value.
