

QGIS Application - Feature request #20036

Allow optional outputs for processing models

2018-10-06 11:02 AM - Olivier Dalang

Status:	Open	Resolution: Copied to github as #: 27858
Priority:	Normal	
Assignee:		
Category:	Processing/Modeller	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Hi !</p> <p>When running a processing model, it happens that you're not interested in all available outputs. In that case, you just leave those outputs as "[Create temporary layer]" and maybe uncheck "Open output file after running algorithm".</p> <p>In batch mode however, it seems all outputs are required. You get Wrong or missing output value: result (row 1) if you decide not to set some specific outputs.</p> <p>This is slightly annoying as it means you have to fill in the forms and then remove the files from your hard drive.</p> <p>It seems to happen only for processing models, not for regular algorithms.</p> <p>Cheers,</p> <p>Olivier</p>		

History

- #1 - 2018-10-08 02:01 AM - Nyal Dawson
- Subject changed from Cannot batch run processing models without choosing files for all outputs to Allow optional outputs for processing models
 - Tracker changed from Bug report to Feature request
