QGIS Application - Bug report #20072
Field validation is not done automatically

2018-10-10 06:41 PM - Etienne Trimaille

Status:	Open			
Priority:	Normal			
Assignee:				
Category:	Forms			
Affected QGIS version:	3.3(master)	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27894	

Description

On my GIF,

   - I set the "schema" combobox to "biocenose marine".

   - My "table" combobox is updated according to the drill down expression : we can see the orange cross with the defautl value "chauvaud 1995 simplifie"

   - I change the value in the "table" combobox to something else

   - I change back the "table" combobox to "chauvaud 1995 simplifie", the orange cross is gone, the form is now valid.

I shouldn't change temporary the value in my "table" combobox to make it valid.

Affected 3.2 and master 3.3
