QGIS Application - Feature request #20075 Print Composer: Sort attribute table objects by non-displayed fields

2018-10-11 12:37 AM - Nick Allen

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or I	Patch sumplied:	Resolution:
Easy fix?:	No	Copied to github as #: 27897
Description		
Short version: All	low Print Composer attribute tables to	o be sorted by fields that are not selected for display.
Long version: In	the Print Composer, the Attribute Tal	ble item allows you to select table fields to display in a print map. There is a
separate "sorting" restricted to fields were lifted and any Example use cas	section that makes it possible to orde that have been selected for display, s field could be used to sort. :e : The end user scans a map of town	er your displayed data by any field. However, the sorting section drop-down is so it is not possible to sort data by "hidden" fields. It would be nice if this restriction ns in a left-right order and would want to see a table that corresponds to this
