

QGIS Application - Feature request #20083

Eliminate multiple dialog levels in Layer Properties

2018-10-12 03:53 AM - Patrick Dunford

Status:	Feedback	Resolution: Copied to github as #: 27905
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Currently in the layer properties it is divided into a number of areas. Most of the areas in this dialog are well designed without the need to bring up another dialog box to make changes to settings.</p> <p>However in the Symbology section there can be rules or other entries that need a separate dialog to edit them.</p> <p>This functionality should as far as practicable be integrated into the Properties dialog.</p> <p>Having the second layer of dialog increases the workload to view and change settings with extra clicks required especially when changing several rules or styles at a time and attempting to compare them.</p>

- Status changed from Open to Feedback

Why not just use the styling dock? It all works perfectly without extra dialogs there.
