

# QGIS Application - Bug report #20108

## QGIS save project not working properly

2018-10-14 10:05 PM - Mario Reyes

|   |                                     |
|---|-------------------------------------|
| <b>Status:</b> Open   |                                     |
| <b>Priority:</b> Normal   |                                     |
| <b>Assignee:</b>  |                                     |
| <b>Category:</b> Project Loading/Saving   |                                     |
| <b>Affected QGIS version:</b> 3.4.0   | <b>Regression?:</b> No              |
| <b>Operating System:</b> Windows 10   | <b>Easy fix?:</b> No                |
| <b>Pull Request or Patch supplied:</b> No   | <b>Resolution:</b>                  |
| <b>Crashes QGIS or corrupts data:</b> No  | <b>Copied to github as #:</b> 27930 |
| <b>Description</b>  |                                     |
| Steps to reproduce the error:   |                                     |
| -Load a 3.2.3 .qgz file in QGIS Master (ae397bf24a) installed via OSGEO4W   |                                     |
| -Save the project using the save button. The * next to the project file name still appears.   |                                     |
| -Save the project in .qgs format following #18477 workaround, but the * still appears, and if the project is closed QGIS asks if I want to save the changes.  |                                     |
| Checking the project file in the directory, it seems the changes are saved, because the time of modification corresponds to when the save button was clicked. |                                     |

### History

#### #1 - 2018-10-14 10:19 PM - Giovanni Manghi

- Priority changed from High to Normal
- Category changed from GUI to Project Loading/Saving

#### #2 - 2018-11-02 10:22 PM - Mario Reyes

Still true in QGIS 3.4

#### #3 - 2018-11-02 10:23 PM - Giovanni Manghi

- Affected QGIS version changed from 3.3(master) to 3.4.0
