| Status: | Closed | |
| Priority: | Normal | |
| Assignee: | | |
| Category: | Processing/QGIS | |
| Affected QGIS version: | 3.3(master) | Regression?: No |
| Operating System: | | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: fixed/implemented |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 27936 |
| Description | | |
| Not sure if it is a feature request or a bug! | | |
| In QGIS 2.18 interpolation plugin, user can set either the cell size or no. columns/rows. But in master, the IDW Interpolation which is the closest to the plugin lacks cell size option. | | |

History

#1 - 2018-10-15 10:20 PM - Giovanni Manghi

- Status changed from Open to Feedback

"Duplicate" of #19701 ?

Both tools are almost unusable without a parameter for output resolution (pixel size).

Hi Gio, they are two different algs. But I agree they are similar issues. As long as there is a note for devs not to forget this tool, happy to mark it duplicate and hence closing.
