

QGIS Application - Bug report #20126

Importing Excel *.xlsm files as well

2018-10-17 08:51 AM - Haitham Shatti

| | |
|---|---------------------------------------|
| Status: Closed | |
| Priority: Normal | |
| Assignee: | |
| Category: Data Provider | |
| Affected QGIS version: 2.18.24 | Regression?: No |
| Operating System: | Easy fix?: No |
| Pull Request or Patch supplied: No | Resolution: no timely feedback |
| Crashes QGIS or corrupts data: No | Copied to github as #: 27947 |

Description

- QGIS can recognize *.xlsx files by dragging and dropping however it doesn't recognize *.xlsm (Macro Enabled) files (despite that it has the same xlsx structure) unless the extension is renamed to *.xlsx
- When importing an Excel file, QGIS recognize the headers only if the second row was not empty and contains a number in the 2nd row, can this "Has header" be an optional check in the sheet import dialog instead of auto detect?.

History

- Status changed from Open to Feedback

does OGR (try ogrinfo) recognize such format?

#2 - 2019-01-21 12:35 AM - Jürgen Fischer

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#3 - 2019-02-24 12:54 AM - Giovanni Manghi

- Resolution set to no timely feedback

- Status changed from Feedback to Closed
