

Status:	Open	Resolution: Copied to github as #: 27949
Priority:	Normal	
Assignee:		
Category:	Processing/GUI	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Open an algorithm dialog</p> <p>switch to batch mode</p> <p>click the browser icon for input layer</p> <p>in the select file dialog, browse to a folder and use the drop-down menu of the formats (let's say esri shapefile) to filter layer. Select any and add.</p> <p>(You may also run the alg at this step)</p> <p>Click on another row in the batch dialog to add another file; in the file selector, it would be nice to have the previously selected format (esri shapefile) instead of having to scroll down to again select the proper format.</p> <p>People will likely use the same format than the default one and this will, if i'm not wrong, align it with other file selector widgets.</p>
