QGIS Application - Bug report #20134
crash when trying to set exluded layer in QGIS Server WMS capabilities

2018-10-17 03:34 PM - Sebastian Brocks

Status:	Closed		
Priority:	High		
Assignee:	Alessandro Pasotti		
Category:	Unknown		
Affected QGIS version:	3.2.3	**Regression?:**	Yes
Operating System:	windows 7	**Easy fix?:**	No
Pull Request or Patch supplied:	Yes	**Resolution:**	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	27955

Description

User Feedback

When I try to exlude a layer from the WMS capabilities, QGIS crashes. The list that appears in a popup titles "Select Restricted Layers and Groups" when I click on the blue plus icon next to the exclude layers box is empty. When I click inside it, QGIS crashes.

Report Details

Crash ID: 69dbd1ba4f36666784e3aa757c8f81441d261952

Stack Trace

```
QgsLayerTreeModel::flags :
QgsLayerTreeView::mouseReleaseEvent :
QWidget::event :
QAbstractItemView::setHorizontalScrollMode :
RtlInitUnicodeString :
QFrame::event :
```

Associated revisions

Revision 6b917e09 - 2018-10-23 08:19 PM - Alessandro Pasotti

Fix QgsProjectLayerGroupDialog with qgz project

Maybe also fix #20134 - crash when trying to set exluded layer in QGIS Server WMS capabilities

I could not reproduce the crash but

QgsProjectLayerGroupDialog was broken

and it was probably the root of the

crash.

- Status changed from Open to In Progress

- Pull Request or Patch supplied changed from No to Yes

PR https://github.com/qgis/QGIS/pull/8291

I could not reproduce the crash but I've found a serious bug in the dialog (fixed in the PR), so I'm not 100% sure that my patch fixes this issue, please test a nightly build ASAP after my PR is merged.
