

QGIS Application - Bug report #20142

Numeric calculation in "Merge selected features" dialog does not work

2018-10-17 06:52 PM - Harrissou Santanna

Status: Closed	
Priority: High	
Assignee:	
Category: Editing	
Affected QGIS version: 3.3(master)	Regression?: Yes
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 27963
Description	
<p>Select two features and click on "merge selected features" button</p> <p>In the new dialog, for a numeric field try to use statistics functions like sum, count or whatever. The field in the "Merge" row becomes empty. If you try some statistics on a literal field you get the result in the field.</p> <p>It's not simply a display issue given that if you do the merge, you get 0 in the numeric field.</p> <p>I check "data corruption" as this is a tool that applies in-place modification and gives a wrong value you can not easily check later on/or rebuild.</p>	

History

- Status changed from Open to Feedback

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

#2 - 2018-11-09 02:15 AM - Nyal Dawson

This works fine here. You'll need to post more detailed steps to reproduce.

#3 - 2018-11-10 05:51 PM - Harrissou Santanna

- Resolution set to worksforme

- Status changed from Feedback to Closed

can't reproduce anymore.
