

QGIS Application - Bug report #20149

Postgis provider dialog does not show empty schema's

2018-10-18 11:12 AM - Richard Duivenvoorde

Status: Open	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: 3.3(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 27970

Description

After creating a fresh schema, this cannot be viewed in the browser or postgis connection dialog.
(not even when you click the 'Also list tables with no geometry')

Only after adding data it will show up.

In the DB-manager the empty schema is at viewable, so you can import data into it.

Would it not be more helpfull if the dialog would show all schema's always?

(Added screenshots of both dbmanager and dialog, empty schema is called 'testschema')
