

QGIS Application - Feature request #20197

Show PostgreSQL- Foreign Table in DB-Manager project tree

2018-10-23 04:17 PM - Max Bohnet

Status:	Open	Resolution: Copied to github as #: 28018
Priority:	Low	
Assignee:		
Category:	DB Manager	
Pull Request or Patch supplied:		
Easy fix?:	Yes	
Description		
<p>The DB-Manager for PostGIS does not show Foreign Tables in a PostGIS database schema. Normal Tables, Views and Materialized Views are shown, but Foreign Tables are ignored.</p> <p>However, i can load the Foreign Table into QGIS using the SQL-Window - tab and loading it using</p> <pre>SELECT * FROM myschema.my_foreign_table</pre> <p>It would be nice if the DB-Manager could show Foreign Tables in the project tree.</p>
