- Status changed from Open to Feedback

Looks like this is caused by a faulty plugin. Try with a clean profile.

Hi Michael, the emails you receive (from [redmine@qgis.org](mailto:redmine@qgis.org)) are from the Redmine program (our issue tracker), actually a bot.

So better login here (#20210) and do any communication :-)

You can Settings/User Profile/Create new profile.

From there you also open the actual directory on your computer (Open Active Profile Folder).

So either remove that folder, or just create a second profile.

A profile contains all your plugins + configuration.
