

## QGIS Application - Bug report #20211

### Crash on exiting QGIS master

2018-10-24 08:51 PM - Andreas Neumann

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Unknown	
<b>Affected QGIS version:</b>	3.3(master)	<b>Regression?:</b> No
<b>Operating System:</b>	Linux	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 28032
<b>Description</b>		
<p>I am experiencing crashes when closing QGIS with the most recent master:</p> <p>When I open QGIS (no plugins enabled, completely empty and new profile), and I do nothing (not even a simple project opened).</p> <p>I close QGIS and it crashes on closing.</p> <p>Am I the only one experiencing such crashes on closing?</p> <p>System: Linux Ubuntu 18.04.1 LTS</p> <p>QGIS: most recent master, self-compiled.</p> <p>Maybe an issue only on my machine?</p> <p>Stack trace:</p> <pre>QGIS died on signal 11[New LWP 6735] [Thread debugging using libthread_db enabled] Using host libthread_db library "/lib/x86_64-linux-gnu/libthread_db.so.1". 0x00007f1d236456c2 in __GI___waitpid (pid=6744, stat_loc=0x7fff41e120ac, options=0) at ../sysdeps/unix/sysv/linux/waitpid.c:30 30  ../sysdeps/unix/sysv/linux/waitpid.c: Datei oder Verzeichnis nicht gefunden. ## History

### #1 - 2018-10-24 08:56 PM - Andreas Neumann

Seems like valgrind stopped outputting information.

Should I run it again with --error-limit=no ?

Perhaps the necessary information is now cut off ...

### #2 - 2018-10-24 09:01 PM - Andreas Neumann

- File `valgrind_qgis.txt` added

Now attaching the full valgrind log.

### #3 - 2018-10-24 09:02 PM - Tobias Wendorff

Andreas Neumann wrote:

*Am I the only one experiencing such crashes on closing?*

I'm experiencing such crashes on exist for several months now. I've never inspected it further, but I think a plugin is the reason. It didn't crash on a fresh installation, but after adding all my standard plugins, it crashed again. Windows 7/10

### #4 - 2018-10-24 09:05 PM - Even Rouault

The log is useful, but can't really explain why such errors would occur. Hum, when I had similar errors in the past, it was due to having several versions of native providers / plugins from the current version and past version. But normally we have modified things so that this should no longer occur. But just in

case can you try removing completely /usr/local/lib/qgis and removing all /usr/local/lib/libqgis\* files, and "sudo make install" again .

#5 - 2018-10-24 09:13 PM - Andreas Neumann

- Resolution set to invalid
- Status changed from Open to Closed

This did it. You were right. Old versions of qgis libraries around 2.99 and such.

After removing everything and reinstalling, the crash is gone.

Thanks a lot!
