<b>Description</b>	
<p>Hi all,</p> <p>when a user select a vertex or some vertices from vertex panel he often needs to see where these vertices are (at all zoom scales, not just when the vertices or feature is out of the map)</p> <p>then I ask for an option that makes the user able to zoom to the selected vertex or vertices</p> <p>many thanks in advance</p> <p>Antonio</p>
