QGIS Application - Bug report #20235
QGIS does not obey saved SSL server exceptions

2018-10-27 07:11 AM - Cory Albrecht

Status:	Open		
Priority:	Normal		
Assignee:	Larry Shaffer		
Category:	Authentication system		
Affected QGIS version:	3.2	**Regression?:**	No
Operating System:	Windows 10 Home	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28056

Description

QGIS 2.18 and 3.2 with GRASS 7, installed via the most recent OSGeo installer. Custom certificate configuration window opens each time the GeoServer WMS layer is opened or reloaded via move, zoom. Choosing "Ignore" instead of "Save & Ignore" makes the warning go away until the next time QGIS is opened, but if "Save & Ignore" is chosen it keeps getting shown.

In Settings→Options→Authentication→Manage Certificates, the exception is listed. It's a self-signed certificate with a host name mismatch.

Issue does not occur in 2.18 on Ubuntu Linux.

History

#1 - 2018-10-27 04:56 PM - Giovanni Manghi

- Affected QGIS version changed from master to 3.2
