

QGIS Application - Feature request #20254

Crosshairs in Georeferencer

2018-10-29 10:31 AM - Knut Krämer

Status:	Open	Resolution: Copied to github as #: 28075
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Georeferencer	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>The georeferencer is a valuable tool for integrating published raster maps with known coordinates.</p> <p>To pick coordinate pairs inside the map area from maps without drawn grid lines, it would be very helpful to display crosshairs from the position of the mousepointer to the outer edges of the georeferencer area (see sketch attached).</p>
