## Crosshairs in Georeferencer

2018-10-29 10:31 AM - Knut Krämer

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> C++ plugins/Georeferencer	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 28075
<b>Description</b>	
<p>The georeferencer is a valuable tool for integrating published raster maps with known coordinates. To pick coordinate pairs inside the map area from maps without drawn grid lines, it would be very helpful to display crosshairs from the position of the mousepointer to the outer edges of the georeferencer area (see sketch attached).</p>
