

QGIS Application - Bug report #20265

3.4 explore button for adding missing layers is disabled

2018-10-29 11:23 PM - Pavel Popoca Cruz

Status: Closed	
Priority: Normal	
Assignee: Nyall Dawson	
Category: Data Source Manager	
Affected QGIS version: 3.4.0	Regression?: No
Operating System: Windows 8.1	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 28086
Description	
When opening a saved project, and the Manage missing layers shows up, the 'explore' button isn't working properly: it appears locked and disabled, so the only way to add missing layers is manually editing the address for data source.
