

QGIS Application - Bug report #20266

Copy/paste style form widget type

2018-10-30 04:31 AM - Lene Fischer

<b>Status:</b>	Open	
<b>Priority:</b>	High	
<b>Assignee:</b>	Denis Rouzaud	
<b>Category:</b>	Forms	
<b>Affected QGIS version:</b>	3.4.5	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 7	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 28087
<b>Description</b>		
In 3.4 copy/paste style for forms does not paste Tried to save/load style - same result  In 3.2 it worked for same feature type		

History

#1 - 2018-10-30 04:35 AM - Lene Fischer

- Subject changed from Copy/paste style form to Copy/paste style form widget type

The forms are created - but the widget types/default values are not added

#2 - 2018-10-30 04:35 AM - Nyall Dawson

- Assignee changed from Nyall Dawson to Denis Rouzaud

#3 - 2018-10-30 02:56 PM - Denis Rouzaud

- Status changed from Open to Feedback

Did you copy forms only?

You need to copy fields category too.

#4 - 2018-10-31 03:15 AM - Lene Fischer

No I haven't copied the fields - The two layer has different fields (table structure) only in the Form they share fields.

If I copy fields wouldn't it change the table structure ?

Another question - I can't copy / paste both at the same time - Then how do I perform the action ?

In 3.2 it worked - except for different geometry types - If I saved the style into a file and deleted the Geometry part, it worked as wanted.

Now I can't even use save style.

- Status changed from Feedback to Open

- Priority changed from Normal to High

**#6 - 2018-10-31 06:47 PM - Denis Rouzaud**

- Status changed from Open to Feedback

You just need to use copy all style categories to have everything coming along.

Otherwise, if you need a specific combination:

- do it one after the other
- use the dialog in vector layer properties to export to file the specific categories you want to export.

**#7 - 2018-10-31 06:48 PM - Denis Rouzaud**

- Regression? changed from Yes to No

I don't see a regression here.

The save style dialog is still accessible (and now can be configured with specific categories, so no need to manually edit the file)

**#8 - 2018-10-31 10:08 PM - Lene Fischer**

- File form.JPG added

No I don't want to copy all styles...

The main problem is that copying the fields is in my mind the data structure - correct me if I'm wrong - and that's not what I want. I want the entire attribute form - including the widget type and filter expression - see image.

**#9 - 2018-11-01 01:05 AM - Denis Rouzaud**

well, the configuration of the widget is actually the field category of the style categories. At the moment, you cannot choose some specific fields you would like to copy.

but I think we are maybe misunderstanding.

when you copy "fields" in the style menu, it doesn't copy the fields but their configuration.

So in your case, you can copy/paste fields then copy/paste form and this should work.

**#10 - 2019-03-09 09:34 AM - Giovanni Manghi**

- Status changed from Feedback to Closed

- Resolution set to no timely feedback

| So in your case, you can copy/paste fields then copy/paste form and this should work.

closing for lack of feedback.

**#11 - 2019-03-09 10:37 AM - Lene Fischer**

- Status changed from Closed to Reopened

It still doesnt work.  
If I copy a form and paste to another layer - nothing happens.  
If i copy all and just past the form it doesnt work either.  
I don't want to copy past all.

- #12 - 2019-03-09 10:40 AM - Giovanni Manghi**
- *Affected QGIS version changed from 3.4.0 to 3.4.5*
  - *Status changed from Reopened to Open*
  - *Resolution deleted (no timely feedback)*
