<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 28128

Description

User Feedback

QGIS crash. It's happened about 4 times since installing 3.4.

Not doing anything with QGIS. It's just open while I'm working in another application.

I have a 3 screen setup on Win 10. Other than that it's pretty normal.
