<b>Category:</b> Build/Install	
<b>Affected QGIS version:</b> 3.4.0	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> up/downstream
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 28138

### Description

New install works on standalone PC but when creating a package for it to work on VDI it is not opening up the QGIS application.

on the Virtual desktop infrastructure it opens QGIS and tries to setup GUI before it disappears. Is this version compatible with VDI and if not what is the latest version available that works with VDI.

I beleive this is not a QGIS problem. Try to ask your VDI provider for support.

As far as I am aware QGIS 3.2 worked fine on VDI.
