<b>Category:</b> mac_os_specific	
<b>Affected QGIS version:</b> 3.4.0	<b>Regression?:</b> No
<b>Operating System:</b> macOS	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 28142
<b>Description</b>	
Hi guys	
Even if I enable the Scale Bar decoration on it's dialog, the scale bar is not displayed on the map view.	
(go to menu View>Decorations>Scale bar...; Enable it)	

### Associated revisions

#### Revision 1fbcab9e - 2018-11-03 03:04 AM - Denis Rouzaud

fix device size in decoration item

the size should take the device pixel ration into account

fixes #20321

#### Revision 8d91a6ee - 2018-11-03 08:03 PM - Denis Rouzaud

fix device size in decoration item

the size should take the device pixel ration into account

fixes #20321

- Status changed from Open to Feedback

Can you check if it works at "top left" position? Are you on a retina display?

Haha! Top left works! A bit too big though...

But top right don't work... Yes, I'm using a retina display... So, do you think it's hidden outside of the screen?

Denis this is probably related to your canvas work -- i suspect the x/y/ position of the decorations is being doubled here

Hi Denis!

I've installed 3.4.1 and the bug is still here... Do you know why?

Thanks for any info

**#10 - 2018-11-13 07:36 AM - Denis Rouzaud**

How did you install QGIS?

Do you have an custom Qt parameter for HiDPI left over?

Hi Denis, I always install QGIS through the DMG package on the QGIS.org website.  
I've never installed QT, nor changed any parameter on QGIS.

Hi Denis!

I installed 3.4.2 and it's fine now! Decorations working properly!

Thanks!
