

QGIS Application - Feature request #20322

save path of menu when right clicking on a menu or icons

Easy fix?:	No	
Description		
It would be nice to have a "save path of menu" in the clipboard when we right click in the menu or and icons. As an example, a right click on CRS layer in the Project Properties would save "Project/Properties/CRS" in the clip board. This could be pasted when responding to a help email in the mailing list. Don't know if this can be done? Could also help identify what icon belongs to what plugin...
