

# QGIS Application - Bug report #20332

## Layer Properties Dialog Box Size

2018-11-02 03:20 PM - M C

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Unknown	
<b>Affected QGIS version:</b> 3.4.0	<b>Regression?:</b> No
<b>Operating System:</b> Windows 10	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 28153
<b>Description</b>	
<p>Thank you for QGIS!</p> <p>Just upgraded to ver. 3.4.0-Madeira. Not a bug really, but the layer properties dialog box is so tall that the buttons at the bottom are partly cut off, making them harder to click. If I try and drag the dialog so I can see the buttons better it jumps back to where it was. I have a standard laptop screen resolution of 1366 x 768. It appears the developer had a larger screen or higher screen resolution and forgot about those with lower res or smaller screens. Screenshot attached showing as good as I can get it.</p> <p>Thank you again for QGIS. It is outstanding.</p>

My bad. You can delete this report or mark is solved. I can resize the dialog by dragging down the top, which fixes the problem as QGIS appears to remember the new size next time the dialog opens.

#### #2 - 2018-11-02 03:32 PM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed
