QGIS Application - Bug report #20349
Processing script editor mangles code

2018-11-03 01:25 PM - Anita Graser

Status:	Closed			
Priority:	High			
Assignee:	Nyall Dawson			
Category:	Processing/GUI			
Affected QGIS version:	3.5(master)		**Regression?:**	Yes
Operating System:	Windows 10, Mac		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	28170

Description

As reported on https://gis.stackexchange.com/questions/300906/qgis-3-2-processing-script-editor-display-spaces-shown-as-tabs:
The Processing script editor behaves weirdly (at least on Windows and Mac). It shows wide spacing where there should be only single spaces or no space at all.
Additionally, more spaces are "magically" introduced if parts of the code are selected with the mouse.
This makes the editor unusable.

Revision ea9d5bb3 - 2018-11-05 01:35 AM - Nyall Dawson

Fix mangled fonts in script editors

Don't override default font letter spacing or stretch -- it's not
safe to do because the results are very dependent on the individual
font's appearance and rendering hints.

Fixes #20349
