Crashes QGIS or corrupts data:	Copied to github as #: 12102

Description

Hello folks,

I am testing the print composer in the current trunk and I discovered this:

- Add a map element to the print composer;
- Add a scalebar (the map field should be Map 0);
- Close the composer and start a new one;
- Add a map element and a scalebar
- The map field in the scalebar says Map 1 as if I am in the previous composer.

Ciao

Luca
