

QGIS Application - Bug report #20472

QML Bar Chart y-axis min-max wrong

2018-11-13 08:36 AM - Simon Gröchenig

Status: Closed	
Priority: Normal	
Assignee: David Signer	
Category: Forms	
Affected QGIS version: 3.4.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 28292

Description

The minimum and maximum values for the y-axis of the QML bar chart does not work if data-defined values are used. The maximum hard-coded number is used instead. If no hard-coded number is preset, the default extent from -0.5 to 0.5 is shown.

See the attached screenshots (and used dataset)!
